ANOTHER REVOLUTION IS SAID TO BE READY TO BREAK IN MEXICO

Texas Rangers Are Ordered to Border

PLOT SAID TO BE HATCHING IN
TEXAS; OUTBREAK PLANNED
WITHIN TWO WEEKS.

WASHINGTON, Nov. 18.—Danger of another well organized and formidable revolutionary movement in Mexico has caused the suspension of the return to their home stations of the American troops sent into the border country during the Madero revolution. The attitude of the United States is one of apprehension of further trouble, against which every precaution is to be taken to insure the strictest neutrality.

It is reported here that a serious situation is undoubtedly developing in Mexico. Recent reports of disturbances in various parts of the republic at first were regarded as based on nothing more than the half-trained soldiers.

Now, however, reports are reaching Washington from various points, indicating that there is danger of another revolution which may absorb within it the lesser and sporadic disorderly bands in various parts of the republic.

Rangers Ordered to Border.
AUSTIN, Tex., Nov. 18.—Two companies of Texas rangers yesterday were ordered to the border with instructions to prevent any activity in Texas toward starting a revolution in Mexico.

These movements were made after a conference between Governor Colquhitt and Ranger Captain Hughes, who claims to have evidence that part of the preparations for a Mexican revolution are under way in Texas.

Captain Hughes said he believed the outbreak was planned to take place within two weeks. With him at the conference were Ranger Captain Fox and Ranger Captain Sanders and members of the state adjutant general's department. Fox and Sanders were ordered to the border after the conference, along with men in the companies who have been on detail here.

From a heretofore reliable source it was learned that General Reyes, now at San Antonio, may be placed under surveillance of Texas authorities.

VICTORIA, B. C., Nov. 18.—The Canada Maru brought news last night of the murder of two foreign missionaries in Sze Chuen, a Cheng Ta correspondent of the Shanghai press said: "Two foreign missionaries have been murdered, one of the American Methodist mission, the other of the Canadian Methodist mission. I do not know their names. Both were stabbed."

WITNESS TELLS OF JUGGLING IN THE STOCK ACCOUNTS

NEW YORK, Nov. 18.—In the Rice-Scheffels trial in the criminal branch of the federal court yesterday, Richard D. Arbuckle, of Keyville, N. Y., a customer of the Scheffels concern, was the principal witness. Arbuckle described how the defendants kept him waiting for weeks on the delivery of Chino Copper bought August 18.

When Arbuckle threatened exposure he got a reply stating that the ten shares ordered by him were a part of a lot of 100 bought by the firm that day. The government expert, Storrick, showed from the books that this was untrue, as there was no record of any purchase of Chino Copper until September 8th. The books showed that the Scheffels concern on that day bought ten shares at a fraction over 15, apparently to make good to Arbuckle. The latter had paid at the rate of 14 5-8. The defendants had to pay the difference.

Another witness, Professor H. A. Sayre, of Tuscaloosa, Ala., identified correspondence between himself and the defendants concerning transactions with them.

AGED ADMIRAL DIES A SUICIDE

WASHINGTON, D. C., Nov. 18.—Rear Admiral John Y. Taylor, U. S. navy, retired, aged 82 years, killed himself by shooting at his residence here. Failing health was the cause.

Admiral Taylor was former medical director of the United States navy, and one of the most distinguished naval surgeons in the country. He was alone in his study when he shot himself. He died within half an hour.

The admiral never left his house during the last two years, since the death of his son, Andrew Eryson Taylor, in an automobile accident at Wilmington, Delaware.

Taylor gained the rank of admiral through services performed during the Civil war. He is survived by a wife, and one daughter, Charlotte Bryson Taylor, a magazine writer, residing in New York.

Miss Colton is reported to have mastered 54 languages.

ANNUAL CROP YIELD OF TRUCKEE CARSON PROJECT

WASHINGTON, Nov. 18.—Reports to the reclamation service of crops raised this year on government irrigation projects are encouraging, according to officials of the bureau. As an evidence of the general prosperity of the farmers, the officials point to the Klamath project in Oregon and California. While \$200,000 has been paid to the government for water rights and various other charges, farm mortgages for this purpose do not exceed 200. During the last three years real estate values on this government project, it is estimated, have increased from 50 to 100 per cent as a direct result of reclamation work. Of the 30,000 acres on this project susceptible of irrigation all but 2500, were irrigated this year; and only two farm units remain open to entry. On the Okanogan project in Washington, 65 per cent of the lands to be reclaimed were under cultivation this year. The average crop yield on the Truckee-Carson project in Nevada is reported to be better than usual, the only crop that proved disappointing being sugar beets. The failure was due largely, it was said, to the inexperience of the farmers with that crop. A beet sugar factory now nearly completed is expected to help the farms next year, in handling this project. The government is spending \$40,000 a month on this project.

Bank Receiver Ed Patterson, of the Nye & Ormsby County bank, visited Manhattan yesterday and today is looking over the wreck in Goldfield. Tomorrow he will be in Tonopah and examine the ruins in this city.

PLEAS OF GUILTY Entered by Prominent Men Who Tarred and Feathered INNOCENT GIRL

LINCOLN CENTER, Kan., Nov. 18.—Pleas of guilty by prominent citizens in the actions brought by Miss Mary Chamberlain, the school teacher who was given a coat of tar in September, have caused a profound sensation here. It was expected that the prosecution would have some difficulty in convicting those on trial, since the mob attacked the girl on a dark night, and not a single word was spoken while the clothes were torn from

her body and the tar applied. The only conversation passed was between Miss Chamberlain and Richard, who was her escort that night, and who later confessed he was paid to lure her to the spot. According to officials who investigated, the only reason for the affair was that a number of meddling suspicious women had whispered evil of the girl and incited their "men folks" to punish her. Investigation showed the girl's reputation was good.

McCarran stated to the court that the witnesses in the case had been scattered to the four quarters of the globe and that he could not possibly prepare for trial by that time. He said that he wanted to find certain witnesses and secure certain depositions, as all of the witnesses except those which the prosecution had held here had left the state and that their whereabouts are at present unknown.

NEW YORK, Nov. 18.—The work of clearing the city's streets of the masses of refuse which piled up during the strike of garbage cart men, now admittedly broken, is proceeding rapidly with more than normal complement of carts out in the principal boroughs. Police guards are still assisting the workers in some section, but there has been a marked thinning down of the force. A bomb thrown into the cellar of the street cleaning department stable on the upper East Side, exploded last night without harming anybody, but a panic ensued among the strikebreakers in the place. The police reserves restored order.

Castles Turned Over and Cars Wrecked

AVAILANCES CAUSED IN ALPS
AND PEOPLE ARE THROWN
INTO A PANIC.

BERNE, Switzerland, Nov. 18.—A violent earth shock was felt throughout Switzerland at 10:27 o'clock last night.

This was followed by lesser quakes. The movement was especially strong in the Cantons of Berne and Zurich, in the district of Interlaken and throughout the region of the Alps. So far as known, there were no casualties.

In Geneva street cars were derailed; in this city the Zurich theater audiences were thrown into a panic and rushed into the streets.

At Chamonix enormous avalanches rushed down Mont Blanc. The seismic motion was from north to south.

Severe in Germany.

BERLIN, Nov. 18.—The earthquake last night which was felt in wide area of central Europe severely damaged the castle of Hohenzollern, on the steep Zollerberg, near Hechingen.

Statues were disfigured and great cracks appeared in the towers. At Constance, in the Grand Duchy of Baden, the spire and cross of the cathedral, the most imposing building in the city, fell.

A colossal statue of Germania, which crowned the postoffice building, tumbled into the street. The kingdom of Wuerttemberg was shaken hard.

In Ebingen five hundred frightened persons spent the night around fires in an open field.

Railway communication with that place has been interrupted.

Earth shocks are unusual in the districts affected and the alarm generally was greater than would have been the case in countries where seismic disturbances are a more common occurrence.

At Frankfurt four houses were shattered, the people running into the street panic stricken.

Great cracks were made in the walls of several buildings.

Stuttgart felt the movement strongly. Houses rocked, pictures fell from the walls and furniture was tumbled about. Reports from Munich, Strassberg and Mayence tell of similar experiences.

There was a panic in the theater at Heidelberg. Near Lautlingen a railroad viaduct fell in.

Several buildings, including St. Stephen's church, were damaged at Muehthausen and a large stone was shaken from the church steeple.

Bricks and tiles from disturbed buildings littered the streets. A theater audience stampeded from the playhouse.

The shock was felt less severely at Vienna, Austria, according to reports.

FOREST RANGERS ARE COMMENDED FOR GOOD WORK

WASHINGTON, Nov. 18.—H. S. Graves, head of the United States forest service, has written to the district foresters throughout the entire country, commending them and their men on their successes during the season just closed in keeping forest fires down to a minimum of destruction.

The excellent results this year, in the opinion of Mr. Graves, are due largely to the fire-fighting lessons learned during last year's destructive conflagrations and to the resulting improvements in the forest service.
